Certification details

Event Details

Event Title	Data Discovery under pressure	**Event short ID:**	Data Under Pressure
Date of Event	08/07/2026	**Expiry date:**	No expiry
Learning Aims	Aims – to describe the process of using data to solve a ambiguous business problem by the delivery of iterative data. Aim to cover, knowing how to find the right data when you don't have the full brief, how to make best use of in-built tools such as databricks unity catalogue, how to avoid building something that doesn't meet the stakeholder brief, and how to keep stakeholders engaged when the problem may take a long time to solve.		
Key skills	Stakeholder Management Data Discovery Presentation and playback User Centric design		
Outcomes	Having completed this session you will be equipped with the skills and knowledge to successfully navigate complex business problems through drawing on your existing data discovery skills to seek out answers to ambiguous questions. We will cover how to support your stakeholders to narrow down their brief through discovery and play back, how to use the tools available within a modern data warehouse to find the data that you need, and how to start small and build big to answer ambiguous questions.		
CPD Points/Hours	1

Congratulations on Your Achievement!

"In a world of constant change, let your lifelong learning leave enduring footprints."
- Marta Kalas, Founder, Open CPD

You've reached a significant milestone in your professional journey by completing this course. Remember, every course you complete builds not only your expertise but also your ability to adapt and thrive in an ever-changing world.

What's Next?

- Share Your Success: Proudly display your certificate on LinkedIn, Facebook, or other social media to showcase your commitment to professional growth.
- Continue Your Journey: Explore further courses and opportunities. Continual learning is the key to ongoing success.
- Stay Connected: Join our community of continuous learners. Participate in forums and discussions to gain insights and share your experiences.

How we secure your certification?

Your certificate is a testament to your dedication and hard work. Keep it in a safe place and refer to it as you progress in your career.

- Your certificate is tamper proof and secured by web3 technology
- Your certificate can be verified on Verify the content of CPD certificates by entering your certificate ID 132047C3KAVC
- Your training provider is proud of your achievement. Their details can also be verified 132047

About Open CPD

We are one of the key steps that powers the change in lifelong learning. Training and event providers use our platform to create self-accreditation, issue and share information rich certificates and badges. They are responsible for the content, delivery, and value of these certificates. Open CPD does not verify the content or delivery of any course or event certificate. Instead, we offer the necessary tools and verification technology to make this process quick, transparent, and cost-effective.

Record Keeping

Want to keep a record of all of your CPD achievements in one place? We've partnered with www.CPDMe.Com, offering you a secure platform for your record-keeping. Just click the link to sign up.
