Event Details

Event Title	Building Scalable Infrastructures	Event short ID:	Securing Data Infra
Date of Event	07/10/2025	Expiry date:	No expiry
Learning Aims	1. How to design data platforms with governance and security in mind 2. Patterns for integrating data lineage, access control, and audit logging into your infrastructure 3. Best practices for securing data pipelines across ingestion, transformation and access layers 4. Strategies for aligning compliance with platform architecture		
Key skills	1. Ability to design governance-aware data platform architectures. 2. Knowledge of implementing data lineage, access controls, and auditing mechanisms. 3. Practical skills in securing data pipelines end-to-end.		
Key outcomes	We explore how to architect data platforms that embed data governance, security controls, and compliance policies into the infrastructure layer. without strong governance and robust security, organizations risk exposing sensitive data, facing compliance failures, and incurring unnecessary costs. We'll also examine how governance plays a critical role in identifying unused, redundant, or orphaned datasets that silently consume vast amounts of storage and compute, allowing organizations to optimize resources.

Congratulations on Your Achievement!

*"In a world of constant change, let your lifelong learning leave enduring footprints."
- Marta Kalas, Founder, Open CPD*

You've reached a significant milestone in your professional journey by attending this event. Remember, every event you attend builds not only your expertise but also your ability to adapt and thrive in an ever-changing world.

What's Next?

- Share Your Success: Proudly display your certificate on LinkedIn, Facebook, or other social media to showcase your commitment to professional growth.
- Continue Your Journey: Explore further courses and events and opportunities. Continual learning is the key to ongoing success.
- Stay Connected: Join our community of continuous learners. Participate in forums and discussions to gain insights and share your experiences.

How we secure your certification?

Your certificate is a testament to your dedication and hard work. Keep it in a safe place and refer to it as you progress in your career.

- Your certificate is tamperproof and secured by Web3 technology
- Your certificate can be verified on [Verify the content of CPD certificates](#) by entering your certificate ID 1320473KA9DL
- Your training provider is proud of your achievement. Their details can also be verified 132047

About Open CPD

We are one of the key steps that powers the change in lifelong learning. Training and event providers use our platform to create self-accreditation and create and share information rich certificates and badges. The responsibility for the content, its delivery, and the value it offers lies with the content creators themselves. We simply provide the tools and verification technology to make this process fast, transparent and cost-effective.
