Event Details

Event Title	Ethics in IT	Event short ID:	Ethics in IT
Date of Event	14/01/2026	Expiry date:	No expiry
Learning Aims	To provide a concise overview of ethics and its significance for IT professionals; to explore how policies, professional organisations, and training can support the evaluation of ethical issues; and to identify appropriate channels for raising ethical concerns		
Key skills	How the review ethical issues. How to raise ethical concerns in a safe way.		
Outcomes	Attendees will gain a clear understanding of what ethics means in the context of IT, drawing on real-world examples. The session will cover workplace policies, like whistleblowing, and provide actionable guidance on how to speak up safely when issues arise. Participants will learn how to contribute to the development and implementation of ethical policies within their organisations, fostering a culture of trust, accountability, and inclusion. Through interactive scenarios and discussion, the presentation will equip IT professionals with the knowledge and confidence to navigate ethical challenges, advocate for positive change, and ensure their workplace remains responsible and resilient. Resources and support networks will be shared to encourage ongoing learning and engagement.

About Open CPD

We are one of the key steps that powers the change in lifelong learning. Training and event providers use our platform to create self-accreditation, issue and share information rich certificates and badges. They are responsible for the content, delivery, and value of these certificates. Open CPD does not verify the content or delivery of any course or event certificate. Instead, we offer the necessary tools and verification technology to make this process quick, transparent, and cost-effective.

Record Keeping

Want to keep a record of all of your CPD achievements in one place? We've partnered with www.CPDMe.Com, offering you a secure platform for your record-keeping. Just click the [link](#) to sign up.
