Event Details

Event Title	Data Roles in the Age of AI	Event short ID:	AI in Data Roles
Date of Event	13/05/2026	Expiry date:	No expiry
Learning Aims	To empower attendees to actively participate in the AI-enabled workforce, by building practical AI literacy and demonstrating how AI can be applied across a range of data roles to enhance productivity, decision-making, and career development.		
Key skills	Identifying high-impact AI use cases within day-to-day role responsibilities; Writing effective prompts for tools such as ChatGPT and other AI assistants; Using AI to support analysis, synthesis, and storytelling with data; Applying AI for problem structuring, summarisation, and decision support; Critically evaluating AI outputs for quality, bias, and reliability; Embedding AI into workflows to improve efficiency and scalability.		
Outcomes	By the end of the session, participants will have a clear understanding of how AI is transforming data roles and the broader workforce, along with practical ways to apply AI in their own work. They will leave with increased confidence, reduced barriers to adoption, and a set of actionable techniques to begin integrating AI into their daily workflows immediately.
