CPD POINTS/HOURS
1

Course or Event Overview

This page provides the key verified details recorded for this accredited course or other CPD activity.

Course Title	Genie Agents: What & Why		
Course name on badge	Why Genie Agents?	**CPD Hours or points awarded**	1
Training or Completion date	27/10/2026	**Expiry date (if applicable)**	No expiry
Delivery Type	Webinar	**Assessed**	No

Aims

The session aims to demonstrate how Databricks Genie and its agent capabilities can help stakeholders move beyond traditional dashboards, investigate the "why" behind their data, automate analytical workflows and reach actionable insights faster. Attendees will also gain practical guidance and lessons learned from building and implementing Genie agents in real-world use cases.

Skills

- Translating an existing manual analytical process into a repeatable, agent-enabled workflow.
- Understanding how to design an agent-driven investigation workflow, from data or alert through to analysis and actionable output.
- Structuring business context, instructions and investigation logic to improve the quality of an agent's responses.
- Analytical thinking: moving beyond what happened to explore why it happened and what factors are driving it.
- Stakeholder collaboration: capturing subject-matter expertise and translating it into context and investigation logic an agent can use.
- Opportunity identification: recognising processes and analytical tasks within your own organisation that could benefit from agentic capabilities.

Outcomes

Through practical examples and demos, I'll show how these agents work, how we've approached giving them the right business context and investigation logic, and the lessons we've learned while building and implementing them. Having completed this session, you will be equipped with the skills and knowledge to identify where Genie agents can add value within your own Databricks environment, understand how to approach automated and on-demand analytical use cases, and apply practical techniques for building agents that deliver relevant and actionable insights.

Certificate Verification

How we secure your certification?

This certificate has been issued through the Open CPD platform and includes verification features designed to support authenticity, traceability, and trust.

- The certificate record is tamper-proof and secured using Web3 technology.
- Certificate verification is quick and easy through the Open CPD verification system, with no login required.
- The issuing provider's details are included in the certificate record and can also be checked through the Open CPD system.

Membership and Provider Commitments

Open CPD members operate under the Open CPD Charter, which sets out shared principles for responsible recognition of learning, including clarity, transparency, ethical representation, and responsible use of verification tools.

Providers using Open CPD are required to sign a declaration confirming that they are the legitimate provider of the training, that the information submitted is accurate and not misleading, and that any CPD hours or points fairly reflect the learning activity delivered.

About Open CPD

Open CPD provides the framework and technology used by training and event providers to create, issue, and verify certificates and digital badges. Open CPD does not deliver the training itself. Responsibility for the learning content, delivery, assessment, and learner outcomes remains with the issuing provider.
